Because the conduct of research rests on the foundation of intellectual honesty, violations call into question not only the validity of the particular research project but the social context in which it is conducted. Scholars must be able to trust their peers, students must be able to trust the integrity of teachers, and citizens must be able to trust the integrity of the results of research performed in institutions of higher education.” - Indiana University Policies & Procedures on Research Misconduct

“Because the conduct of research rests on the foundation of intellectual honesty, violations call into question not only the validity of the particular research project but the social context in which it is conducted. Scholars must be able to trust their peers, students must be able to trust the integrity of teachers, and citizens must be able to trust the integrity of the results of research performed in institutions of higher education.” - Indiana University Policies & Procedures on Research Misconduct

Presenters

Dr. Jeff Elmendorf
Associate Professor
Department of Cellular & Integrative Physiology

Nolan Hoffman
Ph.D. candidate
Department of Cellular & Integrative Physiology

Dr. Jane Williams
Associate Professor and Acting Chair
School of Science, Department of Psychology

• What is research misconduct?

• What are some approaches for its prevention?

• What should you do if you suspect research misconduct?

• How does Indiana University respond to suspected acts of research misconduct?

• How does an incident of research misconduct impact the research team, colleagues and the research community?

Next Workshop:
Mentoring
November 16, 2011
4:00-6:00 pm
Campus Center 406

The Responsible Conduct of Research Series is a workshop series hosted by the IUPUI Graduate Office, the Office of Academic Affairs, the IU School of Medicine Graduate Division, and the Office of Research Ethics, Education and Policy (REEP).
